

# Memo

**To:** File - 1410 W. Tampa  
**From:** Gene Pabst *GP*  
**Date:** February 14, 2000  
**Subject:** Sewer line blockage

On February 8, 2000 Wayne Latimer, Supervisor of Sewer Maintenance, left me a voice mail stating that there had been a backup in the 1400 block of West Tampa. Later I talked to Wayne and told him that I had Rick Brown, Sewer Maintenance, run that line last week. That was only 4 or 5 days ago. Rick said that when he flushed the line he found nothing. Rick said that he saw no grease or anything. Wayne and I discussed the call from 1410 W. Tampa, to the night crew, on January 29, 2000. I also told Wayne that Omer Boyce, Sewer Maintenance, had a call at 1410 W. Tampa on February 7, 2000. Wayne was not aware of this call. Omer told me that he found roots in the line when he ran it. When I asked him about grease he said that when you use a saw on the line that it whips the water up so much that you can't tell anything about it.
